# LUXURY REAL ESTATE UI

Visual design analysis · Typography · Color system · Layout patterns

Reference direction: a premium, futuristic property marketplace using cinematic architecture, soft glassmorphism, oversized typography, rounded cards and restrained accent colors.

Prepared from the supplied UI reference image. Color values and font choices below are recommended approximations, not exact pixel/font identification.

# 1. Design language

**Style:** luxury minimalism with a futuristic editorial feel. **Composition:** full-bleed architectural hero image with layered floating panels. **Mood:** calm, spacious, premium and sophisticated. **Visual hierarchy:** hero headline first, property image second, then navigation and supporting information cards.

### Core interface patterns

| Pattern | Recommended treatment |
|---|---|
| Hero section | Large architectural image; subtle cool-blue overlay behind white text. |
| Top navigation | Floating pill-shaped bar with Buy, Location, Property Type, Max Price and Rent. |
| Side navigation | Vertical stack of circular icon buttons; group related controls with spacing. |
| Floating cards | Discovery/statistics card bottom-left; featured property card bottom-right. |
| Action buttons | Circular controls for search, favorites, bookmarks, share and open-property actions. |
| Surface language | Translucent pale surfaces, thin white borders and soft shadows. |

# 2. Color palette

The following hex values approximate the screenshot's visual palette and can be used as starting design tokens.

**Sky Blue**
#A9D2F0
Hero atmosphere

**Deep Blue**
#527CA7
Image overlays

**Cloud White**
#F7F6FC
Cards / navigation

**Warm Ivory**
#F0E4DC
Property panel tint

**Midnight Purple**
#25105F
Brand accent

**Charcoal**
#24232A
Primary text

**Soft Gray**
#D9D8E0
Borders / icons

**Warm Gold**
#DAB77D
Small highlights

**Suggested balance:** 55% photographic blue, 25% off-white surfaces, 10% translucent gray/beige, 7% dark text, and 3% purple/gold accents.

# 3. Typography system

The exact font cannot be reliably identified from a screenshot. Manrope and Inter are close, practical alternatives.

| Use | Recommended font | Desktop size | Weight / treatment |
|---|---|---|---|
| Hero heading | Manrope or Inter | 72–88 px | 400; light, tight line spacing |
| Property title | Manrope | 18–22 px | 600–700 |
| Section heading | Manrope | 20–24 px | 600–700 |
| Body copy | Inter | 12–14 px | 400; relaxed line height |
| Navigation labels | Inter | 11–13 px | 500 |
| Property metrics | Inter | 32–44 px | 700; strong numeric contrast |

# 4. Shape, spacing and surface tokens

| Element | Suggested value |
|---|---|
| Outer page frame | 44–60 px radius |
| Navigation pill | 28–36 px radius |
| Property cards | 40–56 px radius |
| Icon buttons | Circular (50% radius) |
| Main card padding | 28–36 px |
| Navigation gaps | 24–40 px |
| Glass blur | 16–28 px |
| Card border | 1 px translucent white |
| Shadow | Soft gray, low opacity; avoid heavy black shadows |

# 5. Glassmorphism CSS starter

```
.glass-card {
background: rgba(247, 246, 252, 0.72);
backdrop-filter: blur(22px);
-webkit-backdrop-filter: blur(22px);
border: 1px solid rgba(255, 255, 255, 0.55);
border-radius: 44px;
box-shadow: 0 12px 36px rgba(24, 35, 55, 0.10);
}
```

# 6. Responsive behavior and interaction

| Breakpoint | Guidance |
| --- | --- |
| Desktop | Keep the full hero, floating cards, top navigation and left sidebar. |
| Tablet | Reduce hero heading to 52–64 px; move cards inward and reduce padding. |
| Mobile | Stack property details below the image, compact the top controls, and replace the sidebar with bottom navigation. |

### Interaction checklist

• Dropdown filters for location, property type and maximum price.

• Hover/focus states for navigation and circular action buttons.

• Favorite and bookmark toggles with clear active states.

• Clickable property card or arrow to open a property-detail view.

• Keyboard-accessible controls and visible focus indicators.

• Readable contrast and body text that remains legible over photography.

# 7. Final design recommendation

Preserve the reference’s signature composition: curved architectural photography, oversized lightweight heading, floating translucent cards, rounded navigation and restrained purple/gold accents. Use Manrope for prominent headings and Inter for supporting text. Keep spacing consistent and avoid sharp rectangles, heavy shadows, excessive gradients or unnecessary borders.

Note: This document is a visual design analysis based on the supplied screenshot. Font names, hex values and measurements are proposed approximations, not verified source design tokens.
